The inner child metaphor has often been misunderstood, or more accurately, understood in a multitude of ways that can be confusing. I do not claim to have “the right way” to do inner child work; I only have my way, a way that I have been developing and using for more than 30 years. With the work Allen Berger and I are doing with Emotional Sobriety, it seems like an excellent time to revisit this powerful metaphor in that new context.

Inner child work has most definitely been some of the most healing therapy I have experienced in my personal work and that has also been the case in my professional work with others. It is a powerful way to get to the core of our woundedness and a highly effective way of addressing those wounds.

My definition of being an adult became,
“I am the adult who takes excellent care of the child within me.”
